**ALBUM :** Necrodrone

**RELEASE DATE :** 15/08/2021

**REFERENCE :** OP051/B

**FORMAT :** Immersive Box Set

**INFO :** Why immersive? Because it will destroy your 5 senses !

> View : The box contains a series of 6 exclusive printed cards, all in a SP sealed envelope.

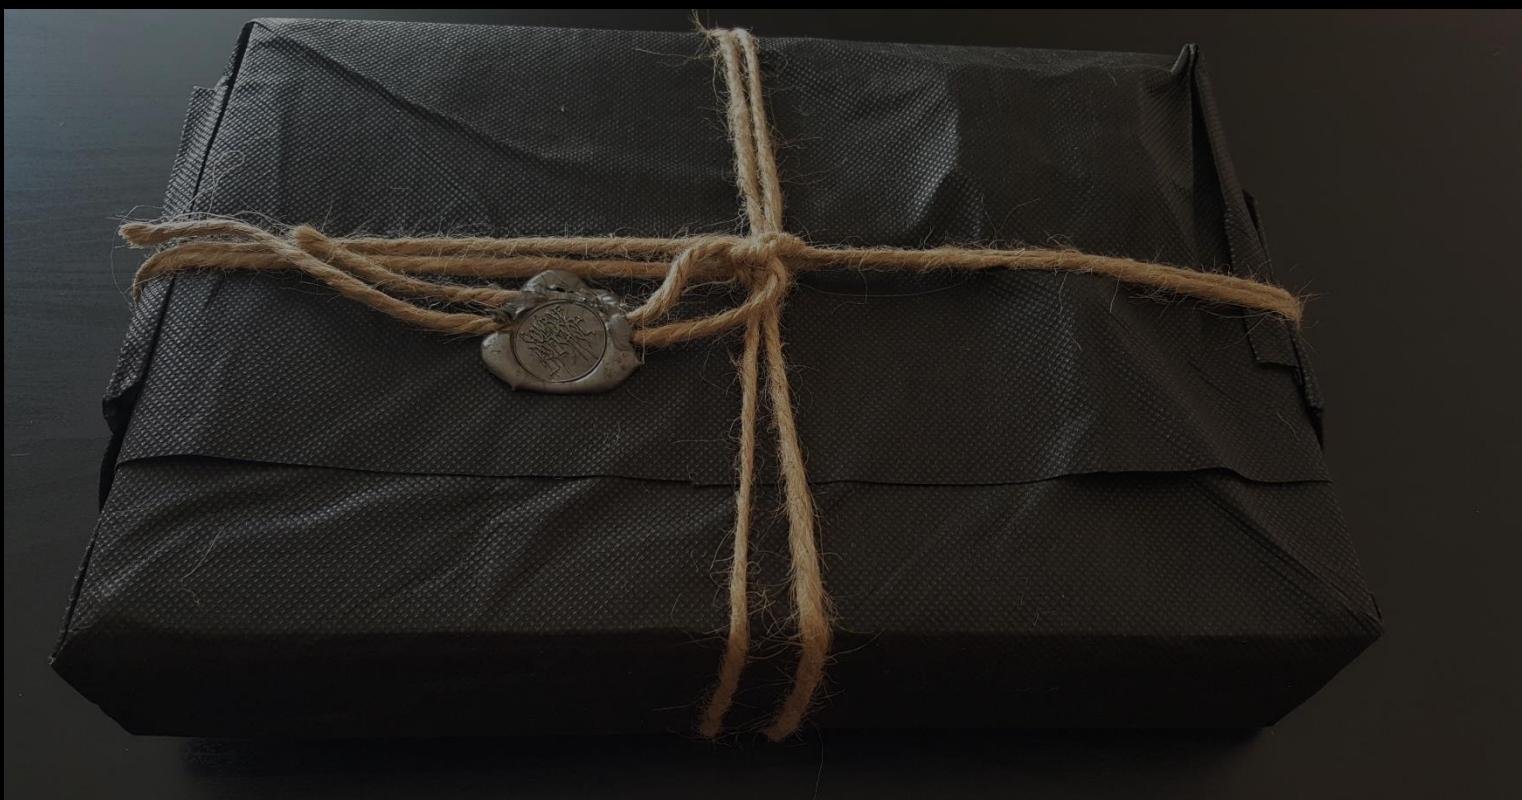

> Smell : The box contains a pouch of incense, the same as the one smelled during the recording.

> Taste : A large quantity of absinthe is necessary for the composition of each album. I share with you the last bottle drunk during the recording (Recipe 1804 - 68°). And his spoon of course, we are among gentlemen...

> Touch : Once the recording of Necrodrone was finished, the guitar strings were cut and were included in this box set. Considering the state of rust, I think they were even used for the recording of the 2 previous albums. Guitar picks are also included, all used personally during the recording...

> Hearing : In addition to the Necrodrone CD and the reissue of Necrodrone (Origine) as a double CD, the box is a real distortion stomp box, the same that was used during the recording. One of the boxes will contain the original stomp box but please, don't ask me which. Plug in your own guitar and join me in the abyss of Drone...

Boxes are limited to 10 copies worldwide.
